

SourceSouth's Juan Sacco Speaks at CafeConf on *Asterisk

October 5th & 6th— SourceSouth Senior Engineer Juan Sacco is the speaker in the main hall at CafeConf. With a massive turnout, Industry rags such as The Inquirer posted news stories pertaining to the conference:

<http://www.theinquirer.net/gb/inquirer/news/2007/10/08/open-source-conference>

The premier Linux & Open Source Conference held annually at “Business University of Argentina”, UADE invited Juan Sacco to speak.

Due to oversold capacity Juan's Session was moved to the main auditorium, and it's time frame expanded to handle the crowd!

In light of the experience, Juan had the following to say: “It was a very positive surprise to see so many people interested in VOIP and Asterisk. Speaking in front of such a crowd was a positive public speaking experience for me and in return I got to introduce Asterisk and VOIP basics to a very large audience. It felt great to contribute to the open source community”.

Juan was invited on an all-expenses-paid trip to speak on *Asterisk in Madrid Spain. Stay tuned for that press release!

Juan Sacco, SourceSouth Senior Engineer and President of asterisk-la.org!
